EDUCATION

Software Engineering Immersive course General Assembly Sep 2021- Dec 2021

INUS Australia Education and Training
ICEP (Inus Customised English Program) General English + IELTS Preparation course July 2019 - July 2020 "Level C1 Diploma"

Master in Computer Science - Faculty of Information and Communication Technologies 2015 - 2021 (FIKT) - Bitola, Macedonia

Bachelor of Informatics, Information Technology - Faculty of Technical Sciences, St.Kliment Ohridski 2010 - 2014 - Bitola Macedonia

SKILLS

- Cloud & DevOps: AWS (CloudWatch, S3, RDS, WAF, SQS, SNS, CloudFormation), OpenShift, Kubernetes, Docker, CI/CD, Linux
- Deployments & Production Support: Production (PROD) Deployments, Release Management, Deployment Validation, Production Support, Incident Troubleshooting, Root-Cause Analysis
- Programming & Scripting: Python, JavaScript, Bash, SQL, Ruby
- Web Development: React, Vue.js, Node.js, Ruby on Rails, HTML/CSS, Tailwind CSS, Bootstrap
- Testing & Automation: Selenium + Python, API Testing, Postman, Functional & Regression Testing, Defect Investigation
- Databases: PostgreSQL, MySQL, Firebase
- Tools: Jira, Confluence, Bitbucket, Git/GitHub, Jama, OpsHub
- Engineering Practices: Agile/Scrum, SDLC, Git Branching & Merging, Requirements Analysis, Code Review
- Integration: REST APIs, Google Translate API, Internationalisation/Localisation (i18n)
- Professional: Problem Solving, Cross-functional Collaboration, Technical Communication, Task & Time Management

PROFILE

I am a Senior DevOps & Software Engineer with a long-standing background in computing and system design. Over the years, I have worked across a range of technical roles, building strong expertise in software engineering, automation, cloud infrastructure, and CI/CD pipelines , with a focus on delivering scalable and reliable solutions. Those who work with me, acknolwedge that I am confident, personable and a hard worker who is eager and happy to learn new things and consistently educate myself on new and advanced technology.

EXPERIENCE

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer & Solutions Specialist

Endava
June 2024 - Present
Assigned to a large-scale Telstra Telecommunications Program

- Lead end-to-end release management across Development, QA, and Production environments. Coordinate software releases by managing ticket selection, pull request reviews, merge approvals, deployment planning, and production rollouts.
- Prepare complex technical release notes, assess deployment risks, define rollback strategies, and obtain client approval prior to production releases.
- Design, develop, and maintain CI/CD pipelines using Jenkins, Docker, OpenShift, Bash, Git, and Linux. Automate deployments and continuously improve engineering workflows to increase delivery efficiency, reliability, and platform stability.
- Manage deployments across DEV, QA, and PROD while ensuring governance, traceability, compliance, and release quality.
- Develop and support applications and deployment processes within a highly secure enterprise environment, following strict security and change management practices.
- Own four Test Automation platforms (TG9000, Test Automation Framework, SVT, and Traffic Scripts), developing automation solutions using Python, Selenium, JavaScript, HTML, CSS, and jQuery to ensure platform stability and continuous improvement.
- Analyse daily regression results, investigate failures, troubleshoot platform issues, and communicate quality metrics to engineering teams and client stakeholders.
- Own and enhance internal web applications using React and React Hooks, delivering new features and improving user experience.
- Produce onboarding guides, technical documentation, and training videos while mentoring and onboarding new engineers.
- Collaborate with developers, architects, QA engineers, project managers, and client stakeholders to deliver secure, reliable, and high-quality software releases.

RESEARCH & PUBLICATIONS

Architecture for Multimedia Learning System With Social Networking Features

International Conference on Applied Internet and Information Technologies

See Publication

Can we Fight Social Media with Multimedia Learning Systems?

International Conference on Advanced Technologies, Computer Engineering and Science (ICATCES 2019) Alanya, Turkey

See Publication

DevOps Engineer

DEK Technologies
May 2023 - June 2024
Assigned by DEK Technologies to a Seeing Machines Engineering Program

- Atlassians(Jira and Confluence), SOX, Jama, OpsHub and Enterprise Architect Admin
- Process automation via Bash and Python integrated with SQL using Atlassians and Jama API.
- Docker
- Enterprise Architect setup SSO Solution
- Backup and Restore to Atlassians Database
- Customer Support
- Collaborated in a multi-cultural team to achieve targets and is a highly team-oriented worker

Junior DevOps Engineer

TeamAssurance
Jan 2022 - Feb 2023

- Dev Ops Engineer with professional expertise in production support and performing deployments
- QA Testing and writing tests
- Process automation via Bash integrated with SQL and AWS services
- Backup and Restore to AWS Database
- Extended test databases for improved developer QA
- Excellent knowledge of AWS WAF Protection
- Collaborated in a multi-cultural team to achieve targets and is a highly team-oriented worker

SOFTWARE ENGINEERING PROJECTS

Ice Concreting

- **This Web appication was created to support my friend's small business, to increase his popularity and make his business well known across the community.**
- React, Tailwind, Firebase, Google authentication, Material UI
- https://ice-concrete.vercel.app/

Share a Memory

This Web Application was established to help people create and share their photo memories to an online platform very similar to social media platforms such as Facebook and Instagram.

- React.js, Bootstrap, Node.js, Express.js, Mongodb
- https://memories-auth.vercel.app/

Multimedia Learning System (MLS)

This Online teaching platform is created to help students and teachers to deploy and download materials covered with subject filter and online realtime chat application to help them to communicate better with their students using social media features.

- React, Tailwind, Google Firebase Database, Google Firebase Authenticationm NoSql, MUI MUI Components.
- https://mls-ivanveselinov.vercel.app/

Uniquee- inspired by Facebook (a group collaboration)

A social media platform that allows users to log in, post and sell Unique and Rare items

- React, Tailwind, Firebase, Google authentication, Material UI
- https://uniquee.vercel.app
